

IF A PATIENT IS UNCONSCIOUS
& NEEDING ASSISTED
VENTILATION FROM ASTHMA
OR ANAPHYLAXIS

AMAX4

A

ADRENALINE

1mcg/kg IV push dose or cardiac arrest dose

M

MUSCLE RELAXANT

First attempt must be best attempt

A

AIRWAY

ETT with cuff. Anticipate high airway pressures
LMA/Mask unlikely to be effective

X

OXGENATE

100% oxygen
Small tidal volumes
Prolonged expiratory time
High peak pressure/insp flow

XTRA BRONCHODILATORS
XTRA VASOPRESSOR/VOLUME
CONSIDER PNEUMOTHORAX

4

4 MINUTES TO HYPOXIC
BRAIN INJURY
